## WORK EXPERIENCE

### BLOCK CHAIN & NFT FRONTEND PAGES

#### Grandora Company

11/2021 - 04/2022

*It was good experience about blockchain tech and nft developing for me.*

### Avensys Offering Tool

#### Fullstack developer / Avensys company

03/2020 - 05/2021

*Rebuild website with React+Laravel*

### STATION WORKER SITE

#### Florida America Station

06/2018 - 12/2019

*It was good experience about MERN stack for me. I made this site as like as job bid site.*

### TILE CONFIGURATOR

#### VENTANO COMPANY

04/2015 - 08/2017

*It was developed with wordpress. I had to develop plugins to manage this functional page and improve performance and speed of frontend pages. At first I looked up about the site and it could support about 2\*2m floors and only rectangle tiles. I improve performance to 10\*10m double and complex and flexible floors and change rendering engine and algorithms. In this project the biggest problem was flexibility about several types of tiles including Square, Octagon, Pentagon, Hexagon, Triangle, Fishscale and all types could be. This is one of my highlight project.*

### "RAJNIE & AZARD LIVE SALE POULTRY CO"

#### 23 PALMCOURT DRIVE, PINTO ROAD, ARIMA

08/2014 - 02/2015

*The client requested to rebuild their sites. It had a lot of database working so I suggest to build site with laravel. At that time Angular + laravel is fashion in developing so I build this with Angular&laravel. Comapny asked me to increase performance with other frontend language. It was developed with javascript and it was not developed with rule of coding. I review the codes and covert it with reactJs. Finally it's performance increased*

## EDUCATION

### Computer Science

Copenhagen University College of Engineering, Denmark

## SKILLS

Typescript / Javascript

ReactJS / Angular / Vue

MERN STACK / MEAN STACK

Web3.js / Ether.js

Blockchain

NextJs, NestJs

Bootstrap CSS (3,4,5)

TailwindCSS

Python / Django

Ruby / Ruby on Rails

WordPress / Magento

Laravel / Yii, Yii2.0

MYSQL / SQLITE / MongoDB

VCS (Github, Gitlab, Bitbucket)

TMS (Trello)

3rd Party

AWS, Firebase

## ACHIEVEMENTS

Bachelor of Computer Science

## LANGUAGES

Finnish

Full Professional Proficiency

English

Full Professional Proficiency
